

RITRANSPARENCY REPORT 2019

Coöperatie DELA

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities. RI staff are tasked with executing RI-related activities, including the outsourcing of engagement, voting and ESG integration. They are also the main contributors to the development of the organisation's RI strategy and policies. Portfolio analysts and managers are ultimately responsible for selecting external managers who integrate ESG factors into the investment decision-making process and who at least have signed the UN PRI. SG 07.3 Indicate the number of dedicated responsible investment staff your organisation has Private PRI 4,5 Select the collaborative organisation and/or initiatives of which your organisation is a member or in which it participated during the SG 09.1 reporting year, and the role you played.  \checkmark \checkmark \checkmark

ESG is one of the elements that is reviewed in the manager selection process. We developed an inhouse scorecard on which we score the short list managers. ESG is an item on this and hence it directly influences the scores and hence the decision for a specific manager.

AM 04.1	Indicate if in the majority of cases and where the structure of the product allows, your organisation does any of the following as part of the manager appointment and/or commitment process
Sets stand	ard benchmarks or ESG benchmarks
_	G objectives and/ or ESG related exclusions/restrictions
_	ives and controls linked to the ESG objectives
_	porting on ESG objectives
_	e investment manager to adhere to ESG guidelines, regulations, principles or standards
Other, spec

Topic or issue	Measurement and reporting of ESG performance across portfolio companies by Infrastructure Fund managers
Conducted by	Internal staff
Asset class	Infrastructure
Scope and process	During the Annual Meeting we (and other investors) requested the Fund Manager to provide quantitative ESG data in their annual and/or quarterly reports.
Outcomes	This discussion led to quantitative ESG measurement and (quarterly and Annual) reporting by Fund Managers

☑ Add Example 2

Topic or issue	Selection of EMD LC manager
Conducted by	Internal staff
Asset class	Fixed income – SSA
Scope and process	ESG factors are fully integrated in the risk assessment of each country's credit. The manager constructs a risk template for each country that takes into consideration economic risks ('ability to pay') and environmental, social and governance risks ('willingness to pay'). Factors such as sanctions also contribute to the analysis. A score is determined for the country, which is reviewed quarterly by the investment team or more frequently when the country is the subject of additional investment research.
Outcomes	Manager is actively applying the risk assessment of each country's credit, which is reflected in quarterly review documentation.

LEA 12.2

Provide an overview of how you ensure your voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

To ensure reliable execution, BMO contracts directly with ISS for electronic proxy voting execution services via their ProxyExchange platform. Through this system and working with custodians and Broadridge, ISS generates electronic ballots for all companies held in client accounts and then processes voted ballots, which are executed through the client's custodial chain. Except for the actual voting decisions, other aspects of vote execution (i.e. ballot delivery, vote processing and certain elements of vote administration) are outsourced to ISS.

Voting administration matters, including client set-up for proxy voting and reporting and ongoing administration of client accounts, are dealt with internally by the GSI team. GSI's Data & Systems and Data & Reporting analysts will liaise as necessary with the clients' custodians and other agents to ensure smooth operation of the voting process. BMO also has access to a large operations support team within ISS who help us resolve any operational/administration issues.

ISS also provides BMO with global proxy voting research, which includes analysis of resolutions. BMO uses ISS research to understand details of companies' proposals. Please note that BMO does not implement ISS' standard voting recommendations, they cast their votes in accordance with voting policies agreed with the client and on the basis of their judgement.

Their voting process uses a risk-based approach to achieve high quality voting while delivering comprehensive coverage of a wide portfolio of stocks. They deploy their specialist governance team on the most complex and sensitive cases and partner with ISS, to deliver voting on the simpler, routine votes through the careful and consistent application of detailed in-house voting policies. In practice, the process works as follows:

Meeting notifications and ballots for clients' accounts will appear in the voting queue on the electronic voting platform used by BMO;

Voting policy will be applied to each shareholder meeting through an automated voting recommendation process;

The voting queue will be checked every morning to determine upcoming votes, particularly those that may require analyst intervention;

All votes designated for analyst intervention in the voting allocation spreadsheet are voted by the team members. This includes large holdings, priority engagement companies, potentially controversial votes, votes on investment matters and issues not covered by voting policies, and shareholder meetings of companies engaged by BMO;

Analysts monitor the voting queue for any votes designated for analyst intervention, and will look at the meeting materials as early as possible to allow sufficient time for research. When analysing the ballot and determining the vote, GSI analysts will:

check the internal database for voting and engagement history to inform current vote:

read proxy research reports on company and review supporting materials (e.g. annual report, CSR report, external reports) for further information on key issues, as relevant:

contact company if clarification is needed to determine vote direction;

determine the intended vote direction and consult with colleagues, fund managers and clients if necessary, particularly in instances where the vote concerns an investment matter or could create controversy. Analysts will also determine if there are any significant ESG issues that go beyond the ballot that should be addressed through engagement outside the annual meeting.

Trained analysts are responsible for voting in each market covered by our voting service;

Automated voting recommendations can be manually overridden any time prior to the cut-off date. If a vote needs to be cast after the cut-off date but prior to the meeting date on a client instruction, ISS will be alerted by BMO to ensure execution of the vote. Their internal "voting policeman" monitors the voting queue and alerts analysts if votes remain outstanding on the cut-off date (e.g. late ballots)

GSI team regularly audits the votes auto-executed under the voting policy to make certain that our voting policies are applied properly by ISS;

Clients who want to monitor voting decisions outside the normal reporting cycle can receive a preview of voting intentions for an entire portfolio or a subset of holdings. BMO can accommodate clients who want to vote, by exception, in a particular way on particular resolutions; this request would need to be triggered by the client. Alternatively, clients can have a "look-through" into the ISS platform.

BMO engages companies before and after general meetings, using their vote to deliver change. At the start of each year, the GSI team sends a copy of its Corporate Governance Guidelines to each investee company, outlining their position and voting strategy for all key governance issues. Through our pre-vote engagement, they highlight the most common governance concerns in each market and invite companies to contact them if there are special circumstances that should be borne in mind when voting at their meetings. After any shareholder meeting, BMO engages companies again to explain the reasons for votes cast in opposition to management; this provides further opportunities to raise key corporate governance and sustainability issues not addressed in the ballot.

Voting is highly integrated with engagement. For priority companies, and for resolutions which are controversial and fall outside BMO's standard voting policy, BMO has governance experts in the team.

You can download the ESG report on this weblink which is publicly available. Please click on the link and open the PDF. You will find the targets on several pages

of the document in the colored text boxes. These targets are in Dutch since the properties, stakeholders and shareholders are all located in the Netherlands.

Please view below the targets that are communicated in this document:

All targets have the base year 2017 and end year 2020 - or stated otherwise:

- Perform annual tenant and consumer satisfaction surveys for our shopping center portfolio with the aim of identifying opportunities to improve satisfaction.
- Make shopping centers future proof by implementing services and facilities for targeted stakeholders in the catchment areas.
- Provide sustainability advice for existing and new tenants and create partnerships regarding sustainability with the top 20 tenants.
- Create partnerships with property managers and all suppliers before the end of 2020 ensuring that all products and services respect sustainable criteria.
- · Achieve higher scores on the employee satisfaction Great Place to Work (baseline 2016) the survey includes health & well-being aspects
- Sign the IVBN code of ethics twice before 2020 and update the ISAE 3402 certificate
- Provide an average of 20 training hours per employees per year
- · All employees participate with the annual Good Causes day of DELA Vastgoed which will be directly linked with the real estate portfolio
- Create 75 residential units above stores before 2020 with the aim to stimulate residents living above shopping areas and creating communities where people

can live, meet and shop.

- · Achieve 15% energy efficiency for the shopping center portfolio between 2016-2020 on a like for like basis
- Achieve for minimal 75% of our portfolio the quality mark 'Good accessibility for disabled and partially sighted people'
- $\bullet \text{Reduce carbon emissions for our management organization with 25\% between 2014-2020 } \\$

PR 04.2 Provide a description of your organisation's approach to incorporating ESG issues in property investment selection

The ESG issues are incorporated within the due diligence (DD) procedure that is applied to every new acquisition for DELA Vastgoed. The following items are captured in this DD

and thus included in the risk assessment for new acquisitions. (The page numbers below refer to the numbering on the standard checklist).

• Natural hazards – page 9 section 7.5 includes the risks of natural hazards that have the highest risk of occurring in the Netherlands, namely the risks of floods.

This section investigates whether this risk is severe for this property.

Building safety and materials – page 2. Section 1.8 checks which Police Standard (safety) there is and if a certification is received for 'Safe Entrepreneurship'.

Page 4 section 3.6 addresses the fire safety on-site.

•Energy efficiency –page 2. Section 1.6, 1.7 and 1.8 describes the EPC certificates that are in place and possible green building certifications and other permits/

standards that are in place.

•Energy supply -page 6. Section 4.9. An analysis/overview need to be prepared of the energy that is generated on-site through renewable energy sources, that is

directly provided towards the property

•Contamination – page 7 section 5.1 addresses the risks that are assessed with regards to asbestos. Section 5.2 addresses contamination of the ground.

•Flooding -page 9 section 7.5 addresses the risks for flooding.

•Indoor environmental quality –page 6, section 4.3: An overview / analysis needs to be provided of all technical equipment, including HVAC that directly

influences the indoor air quality.

Regulatory -page 5 section 3.9 includes all certifications of doors, escalators etc (and page 4 3.8 the inspections of these installations); section

3.10 an

overview of all permits used for operations

•Transportation –page 2 sections 1.1 to 1.4 provides investigates the on-site parking facilities (underground or not) and which transport (roads for cars and

bicycles) are in the proximity of the property.

PR 04.3

Indicate which E, S and/or G issues are typically considered by your organisation in the property investment selection process, and list up to three examples per issue.

☑ Environmental

Natural hazards

Environmental example 1, description

includes the risks of natural hazards that have the highest risk of occurring in the Netherlands, namely the risks of floods Energy efficiency

Environmental example 2, description

describes the EPC certificates that are in place and possible green building certifications and other permits/standards that are in place Energy supply, Flooding, GHG emissions

Environmental example 3, description

An analysis/overview need to be prepared of the energy that is generated on-site through renewable energy sources, that is directly provided towards the property

Social

Building safety and materials

Social example 1, description [OPTIONAL]

checks which Police Standard (safety) there is and if a certification is received for 'Safe Entrepreneurship'

Health, Safety and wellbeing

Social example 2, description [OPTIONAL]

Contamination addresses the risks that are assessed with regards to asbestos. and contamination of the ground Indoor environmental quality provides an overview / analysis of all technical equipment, including HVAC that directly influences the indoor air quality.

Anti-bribery & corruption

Governance example 1, description

The following topics are described in our intern policy document (see references made to the page numbers): • Bribery and corruption – see page 66 section 3.1 (omkoping = bribery). This section forbids every employee to engage in bribery and corruption; this is addressed via prescreening of employees, checking business partners and creating awareness at employees not to engage in sensitive dealings/collaboration (e.g. training, communication etc.) • Data protection and privacy – see page 18-19 on usage of communication tools at DELA. This section describes the policy DELA has regarding the usage of ICT and to ensure • Fraud – page 9 under 'incidents and fraude' where it is clearly described that incidents of fraud occurring at DELA is not accepted. More information is on page 33 section 1.4 where is described what employees should do if they see / identify / suspect any form of fraud and what possible actions they can take. • Political contributions – see page 44-45 section 3C (geschenken/gifts) – This section describes the requirement of respecting the IVBN Internal Code for behavior of employees. In this code it is described that gifts or contributions with political purposes are forbidden. • Whistleblower protection – see page 74-76 section Bijlage 18 (attachment 18) which is communicating the policy regarding 'klokkenluidersregeling' which istranslated in English as whistle blower protection. Included in the policy is in section 1. The policy 2. The purpose of the policy 3. The scope of the policy and applicability for employees 4. Explaining the philosophy of the policy, 5. The principles and the daily implementation, section 6. How to communicate/report any integrity issue, and section 7 who is responsible within DELA on these integrity issues.

Regulatory

Governance example 2, description

includes all certifications of doors, escalators etc and the inspections of these installations and an overview of all permits used for operations

	PR 07			ur organisations selection, appointment and monitoring of third party property managers a	and how they
			Contribute to the management of	f ESG issues for your property investments.	

The selection of external property managers is subject to strict ESG requirements. In the RFP's we have asked in detail how property managers address ESG issues. When evaluating the responses ESG is one of the items in the scorecard that we use. Hence a higher score on this makes it more likely the manager is selected. In the property management contract and manual there are several KPI's concerning ESG issues.
